Frameworks/Tech: React, Rails, Node.JS, Mongoose, Unity, Sass, Github, REST, JSON, Agile, Express, MVC, MERN, Jest, Heroku, Foundation, Figma

PROJECTS

Wine Mate - [Github](#) - wine-mate.herokuapp.com/

- A solo project where a user can plot points for a road trip, leave reviews, research new vineyards and wine varietals from around the country
- Built using Ruby on Rails, PostgreSQL, React and Foundation for styling

Ice Cream Social - [Github](#) - updated-ice-cream-social.herokuapp.com/

- Co-developed an ice cream review website to increase exposure to global flavors
- Built using Ruby on Rails, PostgreSQL, React, RSpec for testing, and Foundation for styling

WORK EXPERIENCE

Moon Factory, Southington, CT - **Full-Stack Engineer** *September 2020 - Current*

- Built websites for local businesses using Node for backend, JavaScript React for frontend, Mongoose, Express, Github for code management, and Figma for planning
- Research competitor sites to enhance user experience and applied to current UI/UX concepts to improve customer conversion
- Met with local businesses to build user stories, discuss page layouts, and decide features to fit the needs of the business

From Heaven LLC, San Diego, CA - **Full-Stack Engineer Intern** *August 2021 - October 2021*

- Developed a web application using Ruby on Rails, Redis, Capybara, and Github for code management and planning
- Reviewed documentation, annotated existing codebase, implemented payment services, and added unit testing
- Heavily involved in writing documentation and collaboratively launched a website in a short sprint cycle

Floor Decor, Middletown, CT - **Sales Manager & Engineer** *September 2016 - March 2020*

- Increased sales volume from \$40k to \$400k a year and developed new business through networking and developing connections in the local community
- Designed and updated the showroom to find flooring solutions that met both the aesthetic and technical needs of clients' projects
- Measured the installation area, examined site conditions, and determined what labor was necessary to complete projects while onsite

EDUCATION

Launch Academy, Boston, MA - **Apprentice Full-Stack Developer** *April 2020 - August 2020*

- Completed a full-stack bootcamp to develop an understanding and ability to implement complex and abstract CS methodologies while honing my technical skills and technical knowledge
- Utilized Agile Methodologies, peer-programming, and test-driven development while working remotely with peers

University of Connecticut, Storrs, CT - *B.A. in History*
